INNOVATION  
HEALTH AND SAFETY  
EFFICIENCY

## Ecocab

Merford introduces a new standard cab which can be easily applied on many kinds of cranes and machines for new situations or replacements. Well-being, safety and efficiency, and an attractive design at a sharp price are the most important aspects of this cab

## An optimum working environment

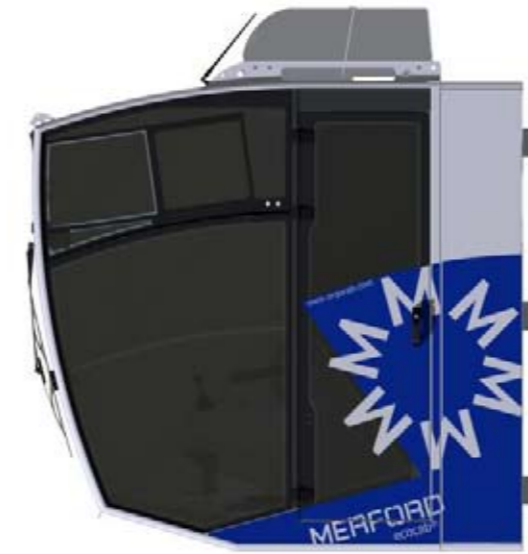

There are many kinds of cranes and machines in different dimensions that require a custom made solution. This results in extra costs and longer delivery times.

By combining several applications the cab offers many user options, due to many cab-configurations this can be less expensive than custom-made solutions.

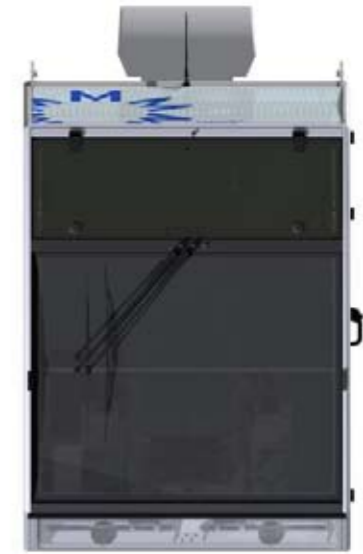

Of course well-being, safety and efficient functioning of the operator are most important aspects of this cab as well as for all other cabs of Merford.

The cab can be equipped with the latest components which guarantee an ergonomic and safe working environment. The design, choice of materials and finishes contribute to the comfort of this product.

The cab is available in a width of 1600 (63.0") or 2000 mm (78.7") and a length of 2050 (80.7") or 2400 mm (94.5").

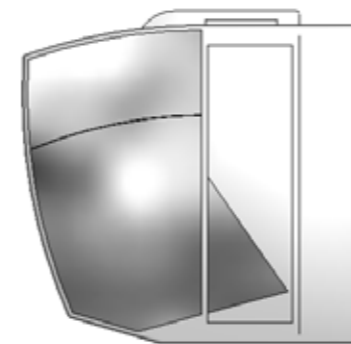

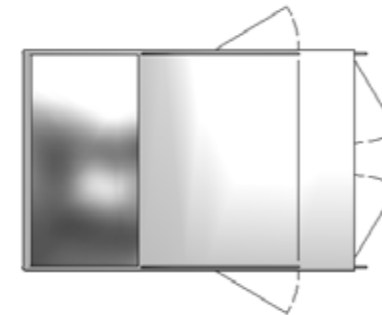

Length: 2050mm or 2400mm

Width: 1600 or 2000mm
